### **Man Arrested in Fayetteville, North Carolina, Mall with Assault Rifle, Ammo**

(CNN) – Police arrested a man carrying an assault rifle and ammunition at a Fayetteville, North Carolina, mall after officers received multiple reports of an armed man walking through a Macy's department store. He was tracked down within minutes near the Macy's wing of the Cross Creek Mall on Thursday evening, police said. "The male subject was detained without incident and was in the possession of an AR-15 assault rifle, a Kevlar vest and multiple rifle ammunition magazines," a Fayetteville Police statement said. While initial reports indicated that a second armed man was in the mall, the man who was arrested was found to be acting alone. Detectives are investigating the incident, and "appropriate charges" will be filed against the man arrested, it added.

### **Measles: First Death in 12 Years Reported in Washington State**

(BBC News) – The death of a woman in Washington state in spring has been confirmed as the first US fatality from measles in 12 years, health authorities say. Measles is highly contagious and easily transmitted but it is rarely fatal. The woman was on medication that had weakened her immune system, Washington State Department of Health spokesman Donn Moyer told reporters. She was hospitalized for several health conditions in the spring at a facility in Clallam County, Mr. Moyer said. "She was there at the same time as a person who later developed a rash and was contagious for measles," he added. Officials have not revealed her name or her age but did say that she was not elderly. An autopsy concluded the cause of death was pneumonia due to measles. "This tragic situation illustrates the importance of immunizing as many people as possible to provide a high level of community protection against measles," Mr. Moyer said. There have been 176 cases of measles in the US so far this year, with 117 of those cases linked to the Disney outbreak, according to the US Centers for Disease Control and Prevention. The last US death from measles was in 2003.

## **Significant Events – International**

### **Colombia Capital on Edge After Two Small Explosions**

(Reuters) – Two small bombs exploded in Bogota, Colombia's capital, on Thursday afternoon, injuring seven, according to the defense minister, who said he would deploy greater numbers of military and police onto the streets in response to the "terrorist doings." Defense Minister Luis Carlos Villegas did not blame any group for the explosions, neither of which caused serious injuries. They come at a time of renewed security concerns in Colombia after several high-profile attacks on infrastructure by FARC rebels. President Juan Manuel Santos departed early from a regional summit in neighboring Peru to chair a security meeting after the explosions, both of which targeted the offices of a private pension fund, Porvenir, in the financial district. Though there was no confirmation of who was responsible, speculation quickly turned to the leftist Revolutionary Armed Forces of Colombia, or FARC, after its recent attacks on major oil pipelines that cross the mountainous country.

# **SITUATION SUMMARY**

## **Cal EOC Incident – 2014 Drought**

- SOC / Inland REOC remains activated in support of 2014 Drought

## **Weather of Concern**

- Isolated to scattered thunderstorms can be expected over the mountains and desert through today, especially during the afternoon and evening hours. A southeast flow aloft will bring a few thunderstorms into the San Joaquin Valley and adjacent foothills, too. In addition to dangerous cloud to ground lightning which could ignite new fires, thunderstorms may bring gusty and erratic winds, briefly heavy rain and localized flooding over the higher terrain.
- Cal OES conducted a State and Federal Partners Weather/Heat Conference call on 07/01/15 at 0900 hours, per the California Excessive Heat Contingency Plan to advise agencies of the heat-related emergency and to assist them with planning and coordination of response activity during the event.
  - State Agencies and Cal OES Regions have briefed their areas and are monitoring for any heat related impacts.
  - No adverse heat related impacts have been reported at this time.

# WEATHER

## WEATHER SYNOPSIS BY REGION:

### **NORTHERN CALIFORNIA AND CENTRAL COASTAL AREAS:**

#### **Eureka Weather:**

Monsoonal moisture will continue to produce a chance of thunderstorms to the mountains through this weekend.

#### **Medford Weather:**

A slight chance of thunderstorms is forecast mainly for Northern California today. On Saturday, mid-level moisture will be lacking but there could be a stronger trigger in Northern California that could result in scattered thunderstorms later in the afternoon and evening. On Sunday, the best chance for storms will be mainly east of the Cascades and Northern California. Temperatures will remain hot through the weekend and will be near triple digits for parts of the Rogue, Illinois and Shasta Valley and Klamath River Valley.

#### **Reno Weather:**

Abundant moisture across the region will bring scattered thunderstorms each afternoon and evening through the weekend. Low pressure developing near the California coast will continue the possibility of thunderstorms through much of the upcoming week. Local flash flooding, frequent lightning and gusty outflow winds will remain the primary threats with these storms.

#### **San Francisco Weather:**

Dry weather conditions are set to return today as mid-level moisture moves northward away from the region. A stronger marine influence will return through the weekend with temperatures near or slightly below seasonal averages through early next week.

# WEATHER

## WEATHER SYNOPSIS BY REGION:

### **CENTRAL CALIFORNIA AND SOUTHERN SAN JOAQUIN VALLEY:**

#### **Sacramento Weather:**

A little above normal temperatures will slowly cool to near normal by the middle of next week as high pressure over the southwest U.S. slowly gives way to a offshore low pressure system. Isolated mountain showers or thunderstorms will remain a possibility over the mountains mainly afternoon and evening hours through the coming week.

#### **Hanford Weather:**

Warm and muggy conditions with scattered showers and thunderstorms will continue in the central California interior through today as monsoonal moisture flows into the region. Scattered afternoon and evening thunderstorms will continue over the high country of the southern Sierra Nevada through the weekend. Temperatures will remain near to above average during the next few days.

### **SOUTHERN CALIFORNIA:**

#### **Los Angeles Weather:**

Through the holiday weekend, a slight cooling trend is expected along with a gradual increase in night and morning low clouds and fog across the coastal plain and valleys. For next week, an upper low will slowly approach the West Coast resulting in continued night and morning low clouds and fog as well as seasonable temperatures.

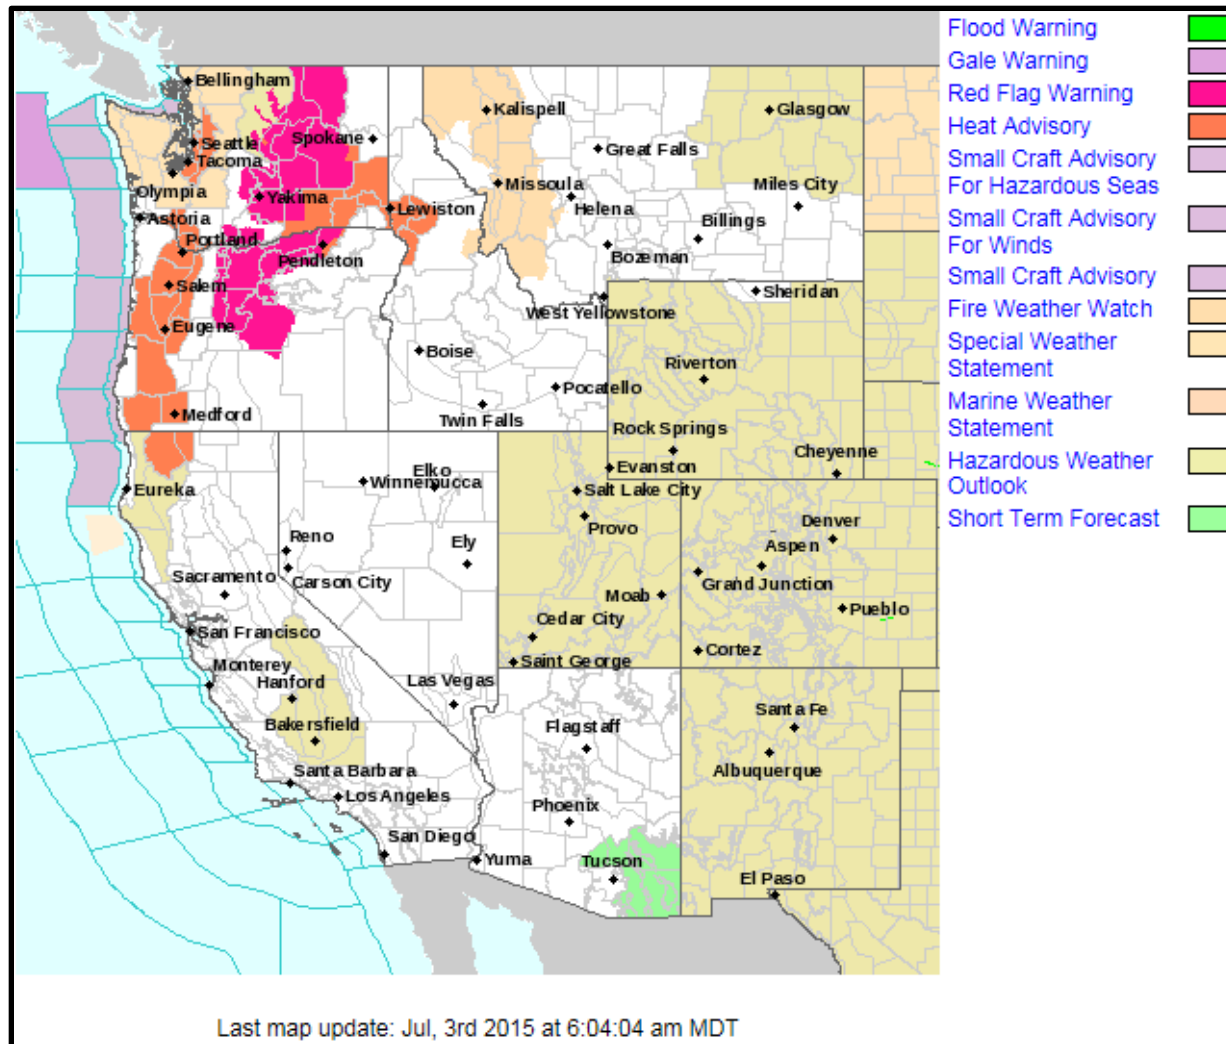

#### **Extreme Southwestern California including Orange, San Diego, Western Riverside and Southwestern San Bernardino Counties:**

Drier and turning a little less humid beginning today and continuing through Sunday as the monsoon flow comes to an end. Southwest flow aloft next week will bring a seasonal weather pattern along with a marine layer that will slowly deepen through next Wednesday.

#### **Southeast California Weather:**

The forecast area will be partly cloudy and hot today through Saturday. A slight chance of showers and thunderstorms are forecast for Sunday afternoon and evening.
